Art Unit: 3652

1. The information disclosure statement filed 1/27/06 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

As can best be determined, the references cited on the PCT search report were not forwarded by the European Patent Office.

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

- 3. The abstract of the disclosure is objected to because it contains legal terms such as "means" and "said". Correction is required. See MPEP § 608.01(b).
- 4. The disclosure is objected to because of the following informalities: page 5, 6th-to-last line, the reference to "lever 7" should be --6--; and page 8, line 16, the reference to "window 14" should be --15-. Appropriate correction is required.

Application/Control Number: 10/566,084 Page 3

Art Unit: 3652

5. Claims 9, 10, and 12-18 are objected to because of the following informalities:

Claim 9, 5th-to-last line "one one" should apparently be --on one--.

Claim 10, line 3, "pivoting" should apparently be --pivot--.

Claim 16, line 3, "said the" should apparently be --said--.

Appropriate correction is required.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim recites that the first carrier is borne for rotation on the lifting cylinder lever "at a radial separation from said pivot axis". However, this seems to contradict claim 9, which recites that the first carrier arm and the lifting cylinder lever both rotate on the same pivot axis.

- 8. Claims 9, 10, and 12-18 are allowable over the prior art of record, provided the objections noted above are corrected.
- 9. Claim 11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

10. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

11. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to James Keenan whose telephone number is 571-272-

6925. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Saul Rodriguez can be reached on 571-272-7097. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.
